

# EU GREEN

EUROPEAN UNIVERSITIES ALLIANCE FOR SUSTAINABILITY:  
RESPONSIBLE GROWTH, INCLUSIVE EDUCATION AND ENVIRONMENT

We are a transnational Alliance of European universities aiming to be the “University of the Future”.

The nine partners of the **EU GREEN Alliance** are strategically aligned for the engagement with all European regions, while globally focused on our communities.

**EU GREEN Alliance** believes in the development of the empowerment, capabilities, opportunities and cooperation of the society for a better and more viable environment in the long run. EU GREEN is “built around a holistic perspective of sustainability, encompassing the economic, societal and environmental dimensions of the term and their impact on one another”.

## We are:

- 📍 **University of Gävle (Sweden)**
- 📍 **Wroclaw University of Environmental and Life Sciences (Poland)**
- 📍 **Università di Parma (Italy)**
- 📍 **Université D'Angers (France)**
- 📍 **Universidade de Évora (Portugal)**
- 📍 **Otto von Guericke Universität Magdeburg (Germany)**
- 📍 **South East Technological University (Ireland)**
- 📍 **Universitatea Din Oradea (Romania)**
- 📍 **Universidad de Extremadura (Spain)**

EU GREEN aims to be “a broad European hub for education, research and innovation in sustainability that goes beyond the consortium borders and acts globally to provide solutions to local or regional challenges, which can be replicated at a global level”.

## EU GREEN focuses on a new growth model by:

- Creating a **New Generation of European citizens**
- Contributing to **Youth Employability**
- Strengthening **Regional Sustainable Development**
- Pooling **Growth and Competitiveness**
- Implementing a **Real social Inclusion**
- Adapting **Scientific development to the arising world needs**
- Reinforcing **Innovation in Digital Competences**
- **Supporting Economic and social ‘quality’ recovery and resilience** in a post pandemic world and potential security threats

Hence, EU GREEN is collaborating to develop into “a recognised learner-centred and research-inspired teaching space, not only virtual but also physical”.

**We want to create experiences, we want to boost mobilities and we want to cooperate beyond the academic level by means of:**

- Joint degrees, summer schools, specialised training courses...
- Micro-credentials or minor degrees on sustainability...
- Sustainable research activities...
- Forum...
- Co-creation of cultural and diversity awareness...

By doing this, we are going to provide the critical thinking, promotion of the **comprehensiveness and quality of knowledge transfer**, all needed to engage the society to widen **our impact across Europe and the world**. This is our willingness to **reinforcing and disseminating the European identity** leaving no-one behind.

**This is EU GREEN, your Gateway to Sustainability.**
